

INTRODUCTION

Our Electronics Division of Taiwan company has been engaged in developing test probes and test fixtures for more than 20 years.

As a leading supplier of some of the finest quality engineered test components and fixtures, we have successfully broadened the scope of both our products and services to such growing fields as computer, electronics, instrumentation, communications industries.

Knowledge and experience gained through years of solving thousands of testing and contacting problems have helped us to meet the challenges of today's sophisticated demands and the diverse testing needs.

Currently, we offer an extensive range test probes, test fixtures and complete test systems for individual testing task and manufactured in Taiwan by using Japan technology. Our special developed machining center enables us to manufacture any standard probes at minimum cost, with its good quality, quick delivery and satisfied service.

We are waiting for your order with respect.

Thank You.
